
Financial Assistance Available for Off-Road Diesel Retrofits!

Need a loan to retrofit your off-road vehicle?

The Pilot Off-Road Loan Incentives (POLI) program from the California Air Resources Board (ARB) may help off-road fleets get loans for diesel retrofits for off-road equipment and earn double credit for early action under ARB's in-use off-road diesel vehicle regulation!

A loan guarantee helps nearly-bankable companies obtain loan financing they otherwise might not obtain by insuring the loan against default. ARB and the California Capital Access Program (CalCAP) can supply loan guarantees for eligible off-road fleets purchasing ARB-verified diesel retrofits.

Looking for double credits under ARB's off-road rule?

Diesel retrofits guaranteed by POLI and installed by March 1, 2009 can earn double credits toward compliance with ARB's in-use off-road diesel vehicle regulation (subject to the requirements of the regulation).

Is your company eligible?

Eligible fleets:

- Employ less than 100 employees
- Earn less than \$10 million in annual revenues (averaged over 3 years)
- Have operated or do operate at least part time in the San Joaquin Valley
- Need financial assistance to obtain a loan for retrofitting their equipment with ARB-verified diesel emissions control systems (VDECS)

Ready to apply?

Fleets should contact one of over 60 participating CalCAP financial institutions to apply. Their contact information can be found at:
